

**3 days of design**

Denmark's Annual Design Festival

# Talking spaces

**June 10, 11:00–11:30 a.m.**

**Sound matters:**

**Acoustic Comfort for Architecture**

Sound influences the way we experience space. Through Fantoni sound-absorbing systems, discover how acoustic design can improve focus, exchange and well-being within contemporary interiors.

**June 11, 10:00–10:30 a.m.**

**Designing Circular Economy:**

**Sustainability Beyond the Product**

Materials derived from post-consumer wood; experimentation with innovative technological solutions for energy sourcing; investment in renewable resources; a strong focus on product recyclability; and the adoption of low impact technologies: these are the core principles of sustainable development.
